Rodrigo Eduardo Dantas Barbalho

Natal, Brazil • rodrigoeduardodb1@gmail.com • linkedin.com/in/rodrigoedb • github.com/rodrigoeduardo • rodrigoeduardo.com

Summary

Software Engineer with 4+ years building web products end to end, from React and Next.js interfaces to Node.js, Django and Java back-ends, infrastructure and CI/CD. Spent 3+ years at Bitflow, a Bitcoin DeFi exchange with $6B+ in transaction volume and 17M+ transactions, working across the frontend, Clarity smart contracts and APIs. Currently CTO at Estoqui, building AI agents and automations on WhatsApp. Open to full-time remote roles.

Experience

Estoqui — **Natal, Brazil**
CTO — *Jul 2026 - Present*

- Lead technical development of an inventory management platform run through WhatsApp with AI agents.
- Own the Django web application and REST API, plus the automated workflows built with n8n.
- Own software architecture, ERP integrations, infrastructure, servers, domains and CI/CD pipelines.

Bitflow Finance — **United States (Remote)**
Software Engineer — *Jun 2023 - Sep 2026*

- Core engineer on a Bitcoin DeFi exchange with $6B+ in total transaction volume, 17M+ transactions and ~30k users.
- Led core frontend development: migrated the legacy Angular 12 codebase to Next.js with TanStack Query and built the complete UI for HODLMM (concentrated liquidity), including dashboards, interactive charts and real-time data.
- Built Clarity smart contracts, SDKs and APIs powering the protocol's core features.
- Developed a transaction indexing service for on-chain data and aggregated external APIs (CoinGecko, LunarCrush, Best in Slot), enabling accurate APY and volume metrics and token exploration dashboards.
- Worked in English with a fully remote US team on daily code reviews and architecture decisions.

Instituto Metrópole Digital (IMD/UFRN) — **Natal, Brazil**
Full-Stack Developer — *Aug 2024 - Apr 2025*

- Built the Sebito Platform, a management system for Brazilian research foundations, up to its first production modules.
- Main frontend contributor in a 4-developer team, defining UI patterns and component architecture.
- Built responsive, accessible interfaces with React, TypeScript and Tailwind CSS, and implemented backend endpoints and fixes with Java and Spring.

NUPLAM / IMD / UFRN — **Natal, Brazil**
Full-Stack Developer — *Jun 2022 - Dec 2023*

- Contributed to OPDigital and SIGNUPLAM, integrated management systems covering HR, finance, inventory and factory automation in a research and manufacturing environment.
- Developed web interfaces with React, Next.js and TypeScript, integrated with Java and Spring WebFlux services using PostgreSQL and MongoDB, and wrote end-to-end tests with Cypress.

Projects

- **raw** (github.com/rodrigoeduardo/raw): installable agentic workflow for Claude Code, driven by GitHub Issues or Linear, that plans, builds, reviews, merges and deploys with configurable human approval gates.

Skills

- **Frontend:** TypeScript, JavaScript, React, Next.js, Tailwind CSS, TanStack Query, Vite, Cypress
- **Backend:** Node.js, Python, Django, Java, Spring Boot, REST APIs, PostgreSQL, MongoDB
- **Infrastructure:** Docker, VPS, DNS/SSL, CI/CD (GitHub Actions), Dokploy, Git
- **Web3:** Clarity smart contracts, Stacks, Bitcoin DeFi
- **AI & Automation:** AI agents, Claude Code, agentic workflows, n8n
- **Languages:** Portuguese (Native), English (Full professional proficiency)

Education

Bachelor's Degree in Information Technology, Universidade Federal do RN (UFRN) — Mar 2022 - Jun 2026
Technical Degree in Computer Science, Instituto Federal do RN (IFRN) — Feb 2018 - Feb 2022
